LOCAL NOTES.

Following is the temperature and rainfall at Tombstone for the week ending Sept. 11, 1897, as reported by H. M. Gee, weather observer:
Highest average temperature... 82.7
Lowest average temperature... 62.4
Rainfall... 2.13

FOR SALE—Bees for sale.

Call on P. N. Wolcott.

A big furniture factory is to be established at Zacatecas.

The daily production of copper in the United States is 1,500,000 pounds.

Judge W. D. Monmonier, Justice of Peace of Pearce was a visitor to the county seat today.

Engineers are making a preliminary survey of the new railroad from Chihuahua to Guerrero.

The Tucson University will open this month, and quite a number of Tombstone scholars will be in attendance.

The biggest year's yield of the Comstock was in 1876, the coin value of that year's production being \$38,572,981.

Seamstress Sewing Machines, equal to all, inferior to none. Reduced to \$2).

AT BARROW'S

The stage was about an hour late this morning which was caused by a delay on the S. P. Washouts are playing havoc with the railroads this year.

J. V. Vickers returned today from the east and a visit to his family, who are summering at Denver. Mr. Vickers probably does more traveling than any cattleman in the Territory. This is the year of the cattleman's harvest, and he is kept continually on the go.

Awarded Highest Honors—World's Fair, Gold Medal, Midwinter Fair.

40 YEARS THE STANDARD.

A RICH STRIKE.

A Former Tombstone's Luck Find in New Mexico.

From a letter received from the scene of the rich finds at Red River, N. M., it is learned that Frank Walters, formerly of Tombstone, and also well known in Bisbee, has made a rich strike and has sold his mines to an eastern syndicate for \$30,000 cash. Frank has already received the cash, and is credited with saying that he will not be happy now until he gets a wife. He proposes to make his choice in Arizona, and will come back to see if his luck will stay with him. The Prospector congratulates Frank on his good fortune and trusts he will successfully court Cupid and land in the realms of happiness as per his dreams and wishes.

The excitement at the new El Dorado still continues, and as an evidence of the marvellously rich finds made we quote the following extract from the Albuquerque Citizen:

"A strike was made on Saturday in the Pauline Lucky, about one mile from Red River, which assayed \$146,000. The assay was made by R. A. Strain. It was a one-eighth inch streak of sylvanite in an eight-inch vein. It is owned by the Pauline Lucky Company, with headquarters at Red River. Considerable excitement exists on the streets of Red River, and specimens which have been placed on exhibition at Butler's store attract large crowds who are eager to see the formation."

Chas. Wilkes, was an incoming passenger this morning from Yuma where he has served his sentence and will remain hereafter to look after his mines in this section.

Mrs. Morris Foley and son John left today for Bisbee. John will take a course in the Tucson University this year having graduated from the Tombstone school.

The eighty-seventh anniversary of Mexican Independence was celebrated yesterday by the Mexican residents of Tombstone. In the evening fireworks and a dance afforded an outlet for the enthusiasm of those imbued with the fervor of Mexican patriotism.

A City of Mexico paper says that the hundreds of young men sent from Mexico every year to be educated in the United States will hereafter be educated in Mexico, and that the government will establish at Agua Calientes a big university where all languages will be taught.

It is expected that the proposed game of baseball between the Bisbee and Ft. Huachuca mines for the \$100 purse will be played here on Oct. 3. Both mines have been heard from and are anxious to play, but for reasons already printed in the Prospector cannot be on hand until the date above mentioned.

A Gypsy fortune teller told a Bisbee girl she would wed a wealthy nobleman who is now going about in the disguise of a tramp seeking his ideal of beauty. When a photo now strikes the backdoor of her house for a hand-out he gets the best there is in the shop, and is smilingly asked to call again.

It is stated that sweet peas will rid a house of flies. If you don't believe it, take a room, except at a single point, and place a bunch of sweet peas in the light. Then notice in an hour the dead flies around it, or rather stupid flies. The odor seems to have a peculiar attraction for flies and they will gather on the blossoms, when the perfume intoxicates them.—Ex.

Here is a Mesilla valley, New Mexico, watermelon story: "Captain E. C. Wandall, of Bosque Redado, says one of his watermelons burst in the field a few nights ago and washed away nearly half a mile of the Acequia Madre. If proper machinery can be secured to lead them, several will be taken to the Albuquerque fair."—Albuquerque Citizen.

The excitement has worn off, the transportation companies have made their big profit, the wild cat mining newspaper reporter has exhausted his fund of exaggeration, and the duped victims of the modern Arabian Knights of fabulous wealth are beginning to discover that distance and hardships among icebergs, with privations, does not give forth a tithe of the precious metal pictured in the press and on the hand bills of the transportation lines, and many of them are returning disappointed and disgusted.—New Mexican.

ARIZONA MINES.

Points About Them From an Outside Source.

In its mining number the Los Angeles Times says concerning Arizona's mineral interests:

It does not seem that Arizona can ever become known as a lead producing country, although lead ores are of common occurrence in the silver and some gold mines. The five great copper centers of the Territory are Bisbee, Longfellow, Morenci, Globe and Jerome. These, together, produced in 1896 \$18,000,000 pounds of copper.

Of other ores the most conspicuous is manganese, but its long distance from market makes it valueless. Zinc is only found as a sulphide, and cost of transportation makes it also valueless. Sulphide of antimony, quicksilver, vanadium and molybdenum are also found. One large deposit of magnesian iron ore has been found in Mohave county. Turquoise has been found in two localities. Mexican onyx in large beds is found in Big Bug creek, Yavapai county, and in Cave creek, Maricopa county. Preparations for working the former deposit, which is said to be very fine, are now under way. Upon the Squaw peak, in the Verde range, lithograph stone of good quality is found, though not equal to the Bavarian stone. In the same place pitted stone is found, capable of taking a high polish. Sand stones of unsurpassed quality are quarried at Flagstaff.

But little has been done to develop the coal resources of Arizona, although the field in northeastern Arizona covers an area of 9,000 square miles. The most western point at which this field is worked is at Gallup, New Mexico. Most all of this field in Arizona is covered by the reservations of the Moqui and Mohave Indians, and is of the crinaceous formation. These coals are lignites.

Credit for the present degree of development of the mines of Arizona is due in a great measure to the railway facilities offered. Without the railway mining by modern methods cannot be carried on.

These roads have facilitated the mineral development of the Territory in other ways than as freight carriers. They have made travel through the region not only comfortable, but delightful. Their lines are attractive by reason of marvelous scenic resources, while at the same time they furnish every accessory for the most luxurious travel.

FOR OVER FIFTY YEARS.

An old, well-tried remedy, Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for diarrhoea. It is pleasant to the taste. Sold by druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.

Winifred's Soothing Syrup, for children.

The Republican says: "The bond of C. D. Hoover as Clerk of the District Court of the First Judicial district for Pima county was filed in the office of the Territorial Secretary yesterday. This is the first document of the kind ever received there. The necessity of recording district clerk's bonds in the office of the Secretary seems to have never been discovered until the discovery was made by Judge George R. Davis of the First district. Yet the law provides for filing them nowhere else, and does provide by reference to the Supreme Court clerk's qualifications that District Court clerk's bonds must be recorded in the office of the Secretary. Failure to comply with it affects the official acts of the clerk."

Mr. Isaac Horner, proprietor of the Barton House, Burton, W. Va., and one of the most widely known men in the state was cured of rheumatism after three years of suffering. He says: "I have not sufficient command of language to convey any idea of what I suffered, my physicians told me that nothing could be done for me; and my friends were fully convinced that nothing but death would relieve me of my suffering. In June 1894, Mr. Evans, then salesman for the Wheeling Drug Co., recommended Chamberlain's Pain Balm. At this time my foot and limb were swollen to more than double their normal size and it seemed to me my leg would burst, but soon after I began using the Pain Balm, the swelling began to decrease, the pain to leave, and now I consider that I am entirely cured. For sale by all dealers in Tombstone and Bisbee."

ARIZONA'S ANTIQUITIES.

Law For Their Protection Will Be Enforced.

The law recently passed by the United States Congress to protect the antiquities on the public domain grew out of the efforts of the Arizona Antiquarian Association to get a similar bill passed by the Nineteenth Legislative Assembly. The law is now in force, and any one caught vandalizing or collecting relics without a permit from the Secretary of the Interior will be held responsible before the law. Lovers of the science of archaeology in Arizona have been patient and long suffering, and now that Congress has given us the protection that our own representatives denied us we will certainly exercise the right under the law to prevent the destruction of our ruins and the sale of objects of antiquity found upon the public domain.—Dr. Miller in Educator.

The Discovery Saved his Life.

Mr. G. Caillouette, Druggist, Beaver, Ill., says: "To Dr. King's New Discovery I owe my life. Was taken with La Grippe and tried all the physicians, but of no avail and was given up and told I could not live. Having Dr. King's New Discovery in my store I sent for a bottle and began its use and from the first dose began to get better, and after using three bottles was up and about again. It is worth its weight in gold. We won't keep store or house without it." Get a free trial of the Tombstone Drug Store.

Everbody Says So. Cascarets Candy Cathartic, the most wonderful medical discovery of the age, pleasant and refreshing to the taste, and gently and positively on kidneys, liver and bowels, cleansing the entire system, dispels colds, cures headache, fever, habitual constipation, and biliousness. Please buy and try a box of C. C. C. today; 10, 25, 50 cents. Sold everywhere guaranteed to cure by all druggists.

Poor Blood

is starved blood. It shows itself in pale cheeks, white lips, weak digestion, no appetite, exhaustion, lack of nerve force, soft muscles, and, chief of all, weak muscles. Your doctor calls it Anaemia. He will tell you that the weakening weather of summer often brings it on.

Scott's Emulsion

of Cod-liver Oil with Hypophosphites, will make poor blood rich. It is a food for over-taxed and weak digestion, so prepared that it can easily be taken in summer when Cod-liver Oil or even ordinary foods might repel.

SCOTT & BOWNE, New York

For sale at 50c and 75c by all druggists.
